

ABOUT ATLAS FINISH

- “Permanent” stain repellent and wear enhancers make almost any fabric into a **Performance Fabric**
- Protects against spills including red wine, coffee, tea, cola and more
- Does not change the look or hand of the fabric
- Immersion process that ensures the stain repellent is through the entire thickness of the fabric and not just on the surface
- Proprietary formula of extra strength stain repellent and binders that encapsulate the individual fibers inside of the yarn
- Most of the liquid beads up and runs off; the little remaining is between the yarns and not inside the yarns
- Wick the remnants from the fabric using a dry paper towel
